

**Subject: EU directive 2002/95/EC in its new version 2011/65 EU, the “Restriction of Hazardous Substances Directive in Electrical and Electronic Equipment” (RoHS directive) and EU directive 1907/2006/EC (“REACH”), EU Regulation Polycyclic Aromatic Hydrocarbons**

We declare that all products are in compliance with the requirements of EU directive 2002/95/EC in its new version 2011/65 EU, the “Restriction of Hazardous Substances Directive in Electrical and Electronic Equipment” (RoHS directive).

As far as the EU directive 1907/2006/EC (“REACH”) is concerned, based on the data received from our suppliers we declare that there could be the presence of the following dangerous substances indicated in the "List of Substances of Very High Concern for Authorization "(SVHC) updated 27.06.2018 (“REACH”):

- Imidazolidine-2-thione; imidazoline-2-thiol CAS 96-45-7
- Boric Acid CAS 10043-35-3 / 11113-50-1
- Azodicarbonamide CAS 123-77-3
- D4 CAS 556-67-2
- D5 CAS 541-02-6
- Dodecamethylcyclohexasiloxane (D6) CAS: 540-97-6

In detail D4-D5-D6 are most frequently used as raw materials in the production of all silicone polymers, therefore their traces are present in the compounds. Tecnica Gasket is not able to evaluate their presence or concentration in its compounds.

Regarding EU Regulation Polycyclic Aromatic Hydrocarbons, we do confirm that there are presences of such ingredients in the carbon black product(s) supplied by us. However, based on laboratory analyses performed by the supplier, most carbon black grades will typically have PAH levels not exceeding 0,1
